CONVENTION ON **BIOLOGICAL** DIVERSITY

Distr. GENERAL

UNEP/CBD/SBSTTA/5/14 22 October 1999

ORIGINAL: ENGLISH

SUBSIDIARY BODY ON SCIENTIFIC, TECHNICAL

AND TECHNOLOGICAL ADVICE

Fifth meeting

Item 4.3.1 of the provisional agenda*

Republic of Lebanon

Montreal, 31 January - 4 February 2000 Office of the Minister of State for Administrative Reform Center for Public Sector Projects and Studies (C.P.S.P.S.)

> MECHANISMS FOR IMPLEMENTATION: ESTABLISHMENT OF GUIDELINES FOR THE SECOND NATIONAL REPORTS

Note by the Executive Secretary

EXECUTIVE SUMMARY

The Conference of the Parties has requested SBSTTA to provide it with advice on the intervals and form of future national reports. This advice should cover: (i) the nature of the information needed from Parties in order to assess the state of implementation of the Convention; (ii) recommendations on improving the reporting process, through guidelines on format, style, length and treatment with a view to ensuring comparability between national reports; and (iii) identification of ways and means to further national implementation of the Convention.

The Conference of the Parties also requested SBSTTA to take into account certain elements when preparing its advice. These are:

- (a) The development of a standard format for reports;
- Consistency between the focus of reports and the programme of work of the Conference of the Parties;
- The need to include information on the implementation of national biodiversity strategies and action plans;
- . The participation of all relevant stakeholders in the preparation and use of national reports.

Section I of the present note recalls that Article 26 of the Convention on Biological Diversity establishes an obligation for Parties to present reports on measures taken for the implementation of the provisions of the Convention and the effectiveness of these measures. Section II summarizes the main conclusions of the synthesis report on the first national reports considered by the Conference of the Parties, while section III recalls decision IV/14, on national reports by Parties, and summarizes the current

^{*} UNEP/CBD/SBSTTA/5/1.

UNEP/CBD/SBSTTA/5/14 Page 2

status of national reporting. Section IV of the note provides information about work undertaken by the Secretariat, with the collaboration of a number of Parties, to develop a methodology to allow the Conference of the Parties to assess the state of implementation of the Convention. Section V suggests that SBSTTA consider the matrix of questions developed as a result of this work as the standard reporting format requested by the Conference of the Parties (annex I).

Section VI considers lessons learned concerning procedures for reporting and offers proposals for the periodicity of reporting, the deadline for submission, and other matters including format, language and confirmation of submission. These options are set out in tabular form in annex II.

Section VII provides information on work carried out to analyse options for streamlining national reporting under five biodiversity-related conventions and invites SBSTTA to recommend that the Conference of the Parties authorize further development of these proposals.

Three recent initiatives to assist Parties with biodiversity planning and capacity development are outlined in section VIII, with the recommendation that the organizations involved be invited to provide information on programme activities and lessons learned.

Finally, in section IX, it is recalled that, under item 4.2.2 of the provisional agenda SBSTTA is to consider the development of indicators of biological diversity. At its third meeting, the Conference of the Parties endorsed the previous recommendation of SBSTTA that development of a core set of indicators for national reporting should be accorded a high priority.

SUGGESTED RECOMMENDATIONS

The Subsidiary Body on Scientific, Technical and Technological Advice is invited to recommend that the Conference of the Parties:

- 1. Approves the guidelines contained in annex I to the present note for use by Parties in the preparation of the national reports called for under Article 26;
- 2. <u>Recommends</u> that Parties prepare their national reports through a consultative process involving all relevant stakeholders and requests Parties to submit their reports:
 - (a) Biennially (option 1) or every four years (option 2);
- (b) Twelve months prior to the meeting of the Conference of the Parties that will consider the reports;
 - (c) In a working language of the Conference of the Parties;
 - (d) In both hard copy and electronic format;
- 3. <u>Considers</u> the recommendation of the Subsidiary Body on Scientific, Technical and Technological Advice on the development of a core set of indicators of biological diversity (item 4.2.2 of the provisional agenda of the present meeting) with a view to incorporating an agreed core set into the guidelines referred to in paragraph 1 above;
- 4. <u>Authorizes</u> the Executive Secretary to proceed with the further development of the proposals for streamlining national reporting contained in section 5.2 of the feasibility study for a harmonized information management infrastructure for biodiversity-related treaties (UNEP/CBD/SBSTTA/5/INF/8), in collaboration with the secretariats of the other biodiversity-related conventions and to report on progress to the Conference of the Parties at its sixth meeting;
- 5. <u>Invites</u> the United Nations Development Programme, the United Nations Environment Programme, the Global Environment Facility and other organizations undertaking regional or global programmes providing support to Parties in biodiversity planning, including capacity development, to provide the Executive Secretary with information on programme activities and lessons learned.

I. INTRODUCTION

- 1. The objective of national reporting, as specified in Article 26 of the Convention, is to provide information on measures taken for the implementation of the Convention and the effectiveness of these measures. The reporting process is therefore not intended to elicit information on the status and trends of biological diversity as such in the country concerned, except in so far as such information is germane to the account of the implementation measures.
- 2. An effective system of national reporting can assist the Conference of the Parties to:
- (a) Consider the lessons learned by Parties in the implementation of the Convention;
- (b) Identify gaps in capacity for policy research and analysis at the national, regional and global levels, including technical and financial requirements;
- (c) Formulate appropriate requests and guidance to its subsidiary bodies, the Secretariat, the financial mechanism, and other organizations with expertise relevant to the implementation of the Convention.
- 3. The national reporting process is therefore key to enabling the Conference of the Parties to assess the overall status of implementation of the Convention.
- 4. The process of reporting, through the medium of well formulated reporting guidelines common to all Parties, will also assist the individual country to monitor the status of implementation of the commitments it has taken on as a Contracting Party. It can assist the country to identify those commitments that are being successfully met, those that have not been implemented, and constraints to implementation.
- 5. Public availability of national reports assists relevant actors (for example, intergovernmental agencies, specialist non-governmental organizations and scientific bodies) to formulate focused strategies and programmes to assist Parties, individually or collectively, with implementation. It similarly enables individual Parties or groups of Parties to identify common issues to be addressed, thus facilitating the development of cost-effective and mutually supportive regional initiatives for implementation.

II. FIRST NATIONAL REPORTS

6. In its decision II/17, the Conference of the Parties determined that the first national reports should focus in so far as possible on the measures taken for the implementation of Article 6. By the time of the fourth meeting of the Conference of the Parties, in May 1998, approximately half the Parties had submitted a report, either full or interim. At that meeting, the Conference of the Parties was able to consider a synthesis of the information contained in these 86 reports 1/ (UNEP/CBD/COP/4/11/Rev.1). A further 21

 $[\]underline{1}/$ Included in this figure is a report submitted by a country that signed but has not yet ratified the Convention.

Parties had submitted their reports by the end of the fourth meeting of the Conference of the Parties (see document UNEP/CBD/COP/4/Inf.34).

7. The synthesis report noted that:

- (a) Very few Parties had complied with the deadline for submission established by the Conference of the Parties in decision III/9, and only half the total number had submitted a report in time for the information contained to be made available to the Conference of the Parties at its fourth meeting;
- (b) Biodiversity strategies and action plans were under development in almost all countries that had reported;
- (c) A few countries had completed the strategy and action plan process, but in the majority of cases it was still at an early stage;
 - (d) Many common issues and constraints could be identified;
- "(e) The integration of the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies was still a long way off, even in those countries where the strategy and action plan cycle had been completed;
- (f) The length, format, treatment and focus of the reports received varied greatly, making it difficult to analyse the information contained and assess the status of implementation of the Convention at national, regional or global levels.

III. ADVICE ON FUTURE NATIONAL REPORTS

- 8. Following its consideration of this synthesis report, the Conference of the Parties, in its decision IV/14, requested:
- (a) Parties that had not submitted a report, or that had submitted an interim report, to submit a full report by the end of 1998;
- (b) The Executive Secretary to prepare a revised version of the synthesis report; and
- (c) SBSTTA to provide it with advice on the intervals and form of future national reports. This advice should cover:
 - (i) The nature of the information needed from Parties in order to assess the state of implementation of the Convention;
 - (ii) Recommendations on improving the reporting process, through guidelines on format, style, length and treatment with a view to ensuring comparability between national reports; and
 - (iii) Identification of ways and means to further national implementation of the Convention.
- 9. In an annex to that decision, the Conference of the Parties identified elements for SBSTTA to consider in the preparation of its recommendation. These are:
- (a) The development of a standard format for national reports, to allow comparability, but provide enough flexibility to give appropriate scope to reflect national conditions and capacities;

- (b) The focus of national reports should be consistent with the work programme of the Conference of the Parties;
- (c) National reports should include information on the implementation of the national biodiversity strategy and action plan and on lessons learned, including identification of gaps in national capacity for policy research and analysis, along with technical and financial requirements for meeting needs identified in the strategy and action plan, and the use of nationally developed indicators;
- (d) The participation of all relevant stakeholders in the preparation and use of national reports is encouraged.
- 10. Since the fourth meeting of the Conference of the Parties, a further five Parties have submitted reports and six have replaced an interim report with a full one. As requested by the Conference of the Parties, the Executive Secretary has prepared an information note $\underline{2}/$ summarizing information contained in the national reports now received and additional to that in the synthesis report submitted to the fourth meeting of the Conference of the Parties.
 - IV. ASSESSMENT OF THE STATE OF IMPLEMENTATION OF THE CONVENTION
- 11. SBSTTA has been requested to provide advice on the nature of the information needed from Parties in order to assess the state of implementation of the Convention, to recommend a standard format for national reports which would allow comparability, and to recommend ways to make future reports consistent with the work programme of the Convention.
- 12. As a contribution to this, the Secretariat has undertaken a pilot project on assessing the status of implementation of the Convention. This project has benefited from the active participation of a group of Parties. $\underline{3}/A$ report on the activities and conclusions of the project is contained in document UNEP/CBD/SBSTTA/5/INF/7. 4/A
- 13. The project sought to identify, and to group by issue, all the obligations on Contracting Parties, as derived from the articles of the Convention and from those elements of decisions of the Conference of the Parties that call for action by Contracting Parties. This matrix of obligations formed the basis of a set of questions, designed to identify the status of implementation of these obligations.
- 14. The participating Parties tested this matrix and provided feedback on the range of questions, their format, and options that allowed the country to respond in more detail or to highlight particular issues that could provide the Conference of the Parties with useful additional information. In the light of this individual feedback and of a collective consultation, a revised matrix was developed.

 $[\]underline{2}$ / Document UNEP/CBD/SBSTTA/5/INF/6. This information note also includes a status report of national reports submitted.

³/ Canada, Ecuador, Finland, Indonesia, Norway, Malawi, Seychelles, Slovenia, and the United Kingdom.

^{4/} Full documentation on this project is available at:http://www.wcmc.org.uk/cbd/measures/.

V. STANDARD REPORTING FORMAT

- 15. The matrix is reproduced in annex I to the present note. It is suggested that this matrix provides the standard reporting format requested by the Conference of the Parties, as it would:
- (a) Elicit the full range of information required to assess the state of implementation of the Convention;
- (b) Allow comparability and permit countries to respond in accordance with national conditions and capacities, through the question-and-answer format and the option to provide additional details;
- (c) Provide a framework for reporting progress on the implementation of national biodiversity strategies and action plans; lessons learned; gaps in national capacity; technical and financial requirements; and nationally developed indicators;
- (d) Avoid the need for countries to devote time and resources to identifying the scope of their report or otherwise deciding how to interpret the reporting guidelines.
- 16. Guidelines structured in this way can avoid a specification of length. (Such specification runs the risk that Parties may delete useful information to reduce the report down to the prescribed length or may include unnecessary information in order to bring the report up to the "right length".) It is anticipated that this format will result in reports that are comparable and without great variations in length. The tasks of analysis and synthesis will thus be simplified.
- 17. The proposed format allows the introduction, in each round of reporting, of questions relating to the implementation of more specific obligations arising out of decisions of the Conference of the Parties at its future meetings.

VI. REPORTING PROCEDURES

- 18. The experience of the first round of reporting has brought to light some operational aspects of the reporting process. It is suggested that elements designed to improve aspects might be included in the recommendation from SBSTTA to the Conference of the Parties.
- 19. Since the purpose of reporting is to enable the Conference of the Parties to assess the state of implementation of the Convention on the basis of reports by Parties, it is important to establish the periodicity of reporting and the deadline for submission in such a way as to derive the full benefit from the reporting process and to ensure that the Conference of the Parties can consider the information from the full range of reports. SBSTTA could make one of the following recommendations to the Conference of the Parties:
- (a) If the Conference of the Parties decides to meet every two years, Parties could be requested to report on a biennial basis to each ordinary meeting of the Conference of the Parties. $\underline{5}/$ The second national reports

⁵/ The periodicity of its ordinary meetings will be considered by the Conference of the Parties at its fifth meeting, under item 19 of the provisional agenda.

could thus be considered at the sixth meeting of the Conference of the Parties and subsequent reports at each successive meeting; or

- (b) Alternatively, if it is felt that a longer interval would allow better preparation of reports by Parties and of analysis of these reports by the Secretariat, SBSTTA could recommend a four-year interval between reports. In this case, at its even-numbered meetings (COP-6, COP-8 etc.), the Conference of the Parties would consider the state of implementation of the Convention on the basis of national reports, whilst at its odd-numbered meetings (COP-5, COP-7 etc.), it would consider revisions to the guidelines for reporting. These two options are laid out in tabular form in annex II to the present note.
- 20. The deadline for submission needs to be considered in light of the experience of the first round of reporting and of the request by the Conference of the Parties to the Executive Secretary to distribute the principal documents for its ordinary meetings at least six months before the opening of the meeting (decision IV/16, paragraph 8).
- 21. In light of the experience gained from the first round of reporting, the deadline for receipt of national reports by the Executive Secretary would need to be set for a date twelve months prior to the meeting of the Conference of the Parties that would consider the reports. Parties would need to be enjoined to comply with the deadline. This would allow a period of six months for the Executive Secretary to undertake the analysis and synthesis of the information, and to comply with the request to make documents available six months in advance of the meetings of the Conference of the Parties (see annex II below).
- 22. In this case, if the second national reports are to be considered at the sixth meeting of the Conference of the Parties which will be held in or around May 2002, the deadline for submission should be set for mid-May 2001.
- 23. As anticipated in decision II/17 (in particular, paragraphs 6 and 10), the high levels of consultation and downloading of national reports posted on the Convention's website confirms the interest generated by the reports themselves and their value to other Parties and to bodies with an interest in the implementation of the Convention and biodiversity planning. It is therefore proposed that all Parties should be requested to submit their reports to the Executive Secretary in both paper and electronic formats.
- 24. The provisions of decision II/17 concerning submission in one of the working languages $\underline{6}$ / of the Conference of the Parties and that reports will not be distributed as official documents of the Conference of the Parties should continue to apply.
- 25. In order to avoid ambiguities about the status of the national report, all reports should indicate the national agency or body responsible for its

 $[\]underline{6}/$ Rule 52 of the rules of procedure for meetings of the Conference of the Parties to the Convention on Biological Diversity states that "[t]he official and working languages of the Conference of the Parties shall be those of the United Nations Organization".

preparation and submission and should include the name, title and signature of the person responsible. 7/

- 26. SBSTTA may wish to include advice to the Conference of the Parties concerning the benefits that derive from the participation of all relevant stakeholders in the preparation and use of national reports.
 - VII. STREAMLINING NATIONAL REPORTING TO AND IMPLEMENTATION OF BIODIVERSITY-RELATED CONVENTIONS
- 27. At its second meeting, the Conference of the Parties requested the Executive Secretary to coordinate with the secretariats of relevant biodiversity-related conventions with a view to, <u>inter alia</u>, exploring the possibility of recommending procedures for harmonizing, to the extent desirable and practicable, the reporting requirements of Parties under those instruments and conventions (decision II/13, paragraph 4 (b)).
- 28. As previously reported, 8/ the Secretariat participated in a feasibility study for a harmonized information management infrastructure for biodiversity-related treaties. The study also involved the secretariats of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), the Convention on the Conservation of Migratory Species of Wild Animals (CMS), the Convention on Wetlands of International Importance especially as Waterfowl Habitat (Ramsar) and the Convention concerning the World Cultural and Natural Heritage (WHC). The report of this study will be available at the fifth meeting of SBSTTA as an information document. 9/
- 29. Section 5.2 of the feasibility study considers questions related to streamlining national reporting to, and implementation of, these biodiversity-related conventions. The study proposes a four step process to encourage and assist the development of coordinated biodiversity-information resources at the national level. These steps are:
- (a) Review and clarify reporting requirements of each convention. In this preliminary phase, the specific reporting requirements for each convention would be clarified. This would identify areas of common information among the national reporting requirements for the five conventions and develop a model for the proposed modular reporting approach;
- (b) Prepare and integrated handbook of national reporting, based on stage one which would suggest how information could be arranged into thematic modules covering all national reporting needs through one process;
- (c) Pilot testing of the handbook and modular reporting in ten countries from different regions;
- (d) Capacity-building in national biodiversity information banks and related technology.

^{7/} Such a practice would avoid doubts that have arisen, for example, when reports have been forwarded to the Executive Secretary by an implementing agency of the Global Environment Facility on behalf of the Party.

^{8/} Document UNEP/CBD/COP/4/11/Rev.1, paras. 137-138.

^{9/} Document UNEP/CBD/SBSTTA/5/INF/8. The report is also available at: http://www.wcmc.orq.uk/convent/treaties.htm.

- 30. At its seventh meeting, held in San José in May 1999, the Conference of the Parties to the Convention on Wetlands requested in its resolution VII.4, the Ramsar Bureau to continue its participation in the implementation of the recommendations contained in the feasibility study on harmonizing information management among environment-related conventions, and, in particular to assist, where resources permit, the proposed pilot testing of a streamlined approach to national-report preparations as suggested in section 5.2 of the report.
- 31. At its forty-first meeting, in March 1999, the Standing Committee of CITES endorsed the recommendations contained in section 5.2 of the feasibility study, requested the CITES Secretariat to prepare an agenda paper and an accompanying draft decision for consideration at the eleventh meeting of the Conference of the Parties to CITES, and recommended that the United Nations Framework Convention on Climate Change and the Convention to Combat Desertification be encouraged to join the five other conventions in the development of the project.
- 32. SBSTTA is invited to consider the proposals contained in section 5.2 of the feasibility study with a view to recommending to the Conference of the Parties that it endorse these proposals and authorize the Executive Secretary to proceed with their further development in collaboration with the other secretariats.

VIII. WAYS AND MEANS TO FURTHER FACILITATE NATIONAL IMPLEMENTATION OF THE CONVENTION

- 33. Although Parties reported on the development of national biodiversity strategies and action plans in their first national reports, they were not invited to make available to the Executive Secretary or to other Parties copies of the final strategy and action plan documents (when completed). The Secretariat receives a steady stream of requests from Parties wishing to consult the strategies and action plans of other Parties. Consultations with the managers of the UNDP-UNEP biodiversity planning support programme (BPSP) have confirmed that there is no central collection of strategy and action plan documents, and that fuller information on and access to completed strategies would be extremely beneficial. SBSTTA might wish to recommend that the Conference of the Parties invite Parties who have completed their strategies to inform the Executive Secretary that they have done so, to provide him with hard copies and (where available) electronic versions, or to inform him when they have been posted on national websites.
- 34. Some Governments have review or audit bodies that assess implementation of environmental policy or international environmental or sustainable development commitments. Examples can include national audit offices or parliamentary committees. Governments can also commission independent reviews of their implementation. Three Parties have informed the Executive Secretary that such national mechanisms exist or that reviews of national implementation

of the Convention have been carried out. $\underline{10}/$ The information contained in such reviews could assist the Conference of the Parties in assessing the state of implementation of the Convention. SBSTTA may wish to recommend that the Conference of the Parties invite Parties to inform it, through the Executive Secretary, of such review mechanisms and of any reports that are publicly available.

- 35. Many Parties require further technical assistance in the implementation of their biodiversity strategies and action plans. As has been noted, 11/inadequate political support and commitment, difficulties in securing national funds and mobilizing external financial resources, weakness of institutions and legislation, lack of mechanisms to access expertise and relevant information, as well as shortage of experienced and skilled staff are among the obstacles hindering the effective implementation of biodiversity action plans in many countries.
- 36. A number of new initiatives seek to address these constraints. One is the UNDP-UNEP biodiversity planning support programme referred to above. 12/Another is the proposed "Service for Implementing National Biodiversity Strategies and Action Plans" to be implemented in Central and Eastern Europe and Central Asia by the UNEP Regional Office for Europe, IUCN The World Conservation Union, the European Centre for Nature Conservation (ECNC) and the Regional Environmental Centre for Central and Eastern Europe (REC).
- 37. Under the framework of the latter initiative, Governments may request the provision of expert advice on ways to best undertake activities identified in their national strategies and action plans or on the identification and solution of constraints and barriers to implementation. The project managers will establish a roster of experts and will make appropriate expertise available to countries upon request.
- 38. At its thirteenth meeting in May 1999, the Council of the Global Environment Facility (GEF) supported the development of a capacity-building initiative with UNDP. The terms of reference of a "Capacity Development Initiative (CDI)" for a comprehensive approach to developing the national capacities needed at the for implementing the Convention on Biological Diversity and the United Nations Framework Convention on Climate Change are under preparation by the GEF secretariat and UNDP for submission to the GEF Council for approval.

^{10/} For example, the Office of the Auditor General of Canada has informed the Secretariat of the findings of the 1998 Report of the Commissioner of the Environment and Sustainable Development to the House of Commons, which includes a review of the implementation of the Canadian Biodiversity Strategy (see http://www.oag-bvg.gc.ca/domino/reports.nsf/html/c8menu_e.html), and that a further review of Canada's implementation of the Convention will be included in the Commissioner's report for 2000.

 $[\]underline{11}/$ For example, in the Executive Secretary's synthesis report (UNEP/CBD/COP/4/11/Rev.1).

^{12/} For further information see http://www.undp.org/bpsp.

39. SBSTTA may wish to recommend that the Conference of the Parties take note of these initiatives and invite the respective implementing organizations, and other organizations providing similar support to Parties in the field of biodiversity planning, to provide information to the Executive Secretary on programme activities and lessons learned.

IX. INDICATORS

- 40. In its decision III/10, the Conference of the Parties endorsed recommendation II/1 of SBSTTA concerning indicators, monitoring and assessment of biological diversity. In this recommendation, SBSTTA considered that the development of a core set of indicators for national reports should be accorded a high priority.
- 41. Under item 4.2.2 of the provisional agenda for its fifth meeting, SBSTTA will consider the development of indicators of biological diversity. The note by the Executive Secretary submitted under this item (UNEP/CBD/SBSTTA/5/12) contains a proposed core set of indicators and considers ways and means to assist Parties with the application of such a core set.
- 42. The format of the proposed guidelines for national reporting, as contained in annex I below, will allow for the incorporation of such a core set of indicators, once this has been adopted by the Conference of the Parties.

Annex I

GUIDELINES FOR NATIONAL REPORTS

Measures of achievement

The following format for preparation of the national report specified in Article 26 of the Convention is a series of relatively simple questions based on the Articles of the Convention and on those elements of decisions of the Conference of the Parties which are addressed to Contracting Parties. Responses to these questions will help Contracting Parties to review the extent to which they are meeting the obligations of the Convention and will assist the Conference of the Parties to assess the status of implementation of the Convention. The wording of questions follows the wording of the Articles and Decisions as closely as possible. 1/

The questions are simple in nature in order to facilitate completion of the review. In most cases they require simply a tick in one or more boxes. Following each set of questions there is a box for further comments. Contracting Parties are invited to provide a more detailed response to the preceding questions at this point. This is an opportunity to identify particular successes or constraints. In particular this box could be used to identify cases where the reporting of no action or of a partial fulfillment of the obligation is the result of inadequate resources or a need for assistance, rather than a decision not to take action on a particular obligation.

In order to assist with the review and synthesis of the information in the reports, respondents are asked to ensure that the further information provided in this box is closely related to the preceding questions and is as succinct as possible. There is no set limit on length, but is anticipated that Parties will be able to provide adequate and useful information in a maximum of a page or two at each of these points.

There is an opportunity at the end of the document to communicate any issues relevant to implementation of the Convention that have not been addressed by the questions below. The Executive Secretary would also welcome any comments on the adequacy of the questions, and difficulties in completing the questions, and any further recommendations on how these reporting guidelines could be improved.

It is recommended that Contracting Parties involve a wide range of stakeholders in the preparation of the report, in order to ensure a participatory and transparent approach to its development. A box is provided in which to identify those groups who have been involved.

^{1/} Please note that obligations implied or specified by some decisions have been omitted where they are duplications of obligations already in the Articles or in other decisions, or where the deadline for compliance is now passed and information on the action undertaken is no longer relevant.

Contracting Parties are requested to submit their second national report in this format to the Executive Secretary by [15 May 2001]. Parties are requested to submit an original signed copy by post and an electronic copy on diskette or by electronic mail. An electronic version of this document will be sent to all national focal points and this will also be available from the Convention's website at:

http://www.biodiv.org.

Completed national reports and any comments should be sent to:

Article 5 Cooperation

1. Has your country developed effective cooperation for the sustainable management of transboundary watersheds, catchments, river basins and migratory
species through bilateral and multilateral agreements? (decision IV/4, annex,
para. 9(k))
a) no ()
b) yes (please give details below)
c) not applicable
2. Has your country developed management practices for transboundary protected areas? (decision IV/15, para.6)
a) no pagagagagan and a sagagagagagan as a sagagaga
b) yes - limited extent (please give details below)
c) yes - significant extent (please give details below)
d) not applicable

Article 8 In-situ conservation [excluding Articles 8h and 8j]

39. Has your country established a system of protected areas which aims to conserve biological diversity (8a)?
a) system under development
b) national review of protected areas coverage available
c) national protected area systems plan in place
d) relatively complete system in place
40. Are there nationally adopted guidelines for the selection, establishment
and management of protected areas (8b)?
and a) no this control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contr
b) under development
And c) yes ()
41. Does your country regulate or manage biological resources important for the
conservation of biological diversity with a view to ensuring their conservation and sustainable use (8c)?
a), no production of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state
b) early stages of development
c) advanced stages of development
d) programme or policy in place
e) reports on implementation available
42. Has your country undertaken measures that promote the protection of
ecosystems, natural habitats and the maintenance of viable populations of
species in natural surroundings (8d)?
a) no measures
b) some measures in place
c) potential measures under review
d) comprehensive measures in place
43. Has your country undertaken measures that promote environmentally sound and sustainable development in areas adjacent to protected areas (8e)?
a) no measures
b) some measures in place
c) potential measures under review
d) comprehensive measures in place
44. Has your country undertaken measures to rehabilitate and restore degraded ecosystems (8f)?
a) no measures
b) some measures in place
c) potential measures under review
d) comprehensive measures in place
45. Has your country undertaken measures to promote the recovery of threatened
species (8f)?
a) no measures
b) some measures in place
c) potential measures under review
d) comprehensive measures in place
46. Has your country undertaken measures to regulate, manage or control the
risks associated with the use and release of living modified organisms resulting from biotechnology (8g)?

Article 11 Incentive measures

80. Are programmes in place to identify and ensure the adoption of eco	
and socially sound measures that act as incentives for the conservation	ı and
sustainable use of components of biological diversity?	
a) no	
b) early stages of development	
c) advanced stages of development	
d) programmes in place	
e) review of implementation available	
Decision III/18. Incentive measures	
81. Has your country reviewed legislation and economic policies to ide	
promote incentives for the conservation and sustainable use of componer	its of
biological diversity?	
a) no	
b) reviews in progress	İ
c) as far as practically possible	
82. Has your country ensured the development of mechanisms or approach	
ensure adequate incorporation of both market and non-market values of h	
diversity into plans, policies and programmes and other relevant areas,	inter
alia, national accounting systems and investment strategies?	
a) no	
b) early stages of identifying mechanisms	
c) advanced stages of identifying mechanisms	
d) mechanisms in place	
e) review of impact of mechanisms available	
83. Has your country developed training and capacity building programm	ies to
implement incentive measures and promote private-sector initiatives?	
a) no	
b) planned	
c) some	
d) many	
84. Has your country incorporated biological diversity considerations	into
impact assessments as a step in the design and implementation of incent	ive
measures?	

85. Has your country shared experience on incentive measures with other

Contracting Parties, including making relevant case studies available to the

a) no b) yes

Secretariat?

b) yes - previous national report

d) yes - other means (please give details below)

c) yes - case studies

Decision IV/10. Measures for implementing the Convention [part]

86. Is your country actively designing and implementing incentive measures?

Decision II/11 and Decision III/15. Access to genetic resources

124. Has your country provided the secretariat	
legislation, administrative and policy measures	, participatory processes and
research programmes?	
a) no	
b) yes, within the previous national re	port de la la la la la la la la la la la la la
c) yes, through case studies	
d) yes, through other means (please give	e details below)

125. Has your country implemented capacity-building programmes to promote successful
development and implementation of legislative, administrative and policy measures and
guidelines on access, including scientific, technical, business, legal and management
skills and capacities?
a) no vers a sur empere de la la la la la la la la la la la la la
b) some
c) many of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains of the self-contains o
126. Has your country analysed experiences of legislative, administrative and policy
measures and guidelines on access, including regional efforts and initiatives, for use
in further development and implementation of measures and guidelines?
a) no
b) analysis in progress
c) analysis completed
127. Is your country collaborating with all relevant stakeholders to explore, develop
and implement guidelines and practices that ensure mutual benefits to providers and
users of access measures?
a) no
b) 'yes - limited extent
c) yes - significant extent
128. Has your country identified national authorities responsible for granting access
to genetic resources?
a) no
b) yes
129. Is your country taking an active role in negotiations associated with the
adaptation of the International Undertaking on Plant Genetic Resources for Food and
Agriculture?
a) no

198. Has your country integrated forest biological diversity considerations in
its participation and collaboration with organizations, institutions and conventions affecting or working with forest biological diversity?
a) no the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second
b) yes - limited extent
c) yes - significant extent
199. Does your country give high priority to allocation of resources to
activities that advance the objectives of the Convention in respect of forest biological diversity?
a) no
b) yes an individual and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second and a second a second and a second and a second and a second and a second and a second and a second and a second and a second and a second a
•
For developing country Parties and Parties with economies in transition 200. When requesting assistance through the GEF, Is your country proposing
projects which promote the implementation of the programme of work?
a) no
b) yes
Further comments on implementation of these Decisions

Decisions III/21 and IV/15. Relationship of the Convention with the CSD and biodiversity-related conventions

201. Is the conservation and sustainable use of wetlands, and of migratory species and their habitats, fully incorporated into your national strategies, plans and programmes for conserving biological diversity?	
a) no	Allen Orang
b) yes	
202. Are the national focal points for the CBD and the competent authorities of the Ramsar Convention, Bonn Convention and CITES cooperating in the implementation of these conventions to avoid duplication?	
a) no	
b) yes - limited extent	
c) yes - significant extent	
203. Has your country submitted to the Secretariat information on tourism and its impacts on biological diversity, and efforts to effectively plan and manage tourism?	
a) no	
b) yes - previous national report	
c) yes - case studies	
d) yes - other means (please give details below) 204. Has your country submitted to the Secretariat information on	_
biodiversity-related activities of the CSD (such as SIDS, oceans, seas and freshwater resources, consumption and production patterns)? a) no	
b) yes - previous national report	
c) yes - correspondence	
d) yes - other means (please give details below)

If your country has completed its national biodiversity strategy and action plan (NBSAP), please give the following information:

Date of completion:
If the NBSAP has been published please give
Title:
Name and address of publisher:
TSBN:
Price (if applicable):
Other information on ordering:
If the NBSAP has not been published
Please give full details of how copies can be obtained:
If the NBSAP has been posted on a national website
Please give full URL:
If the NBSAP has been lodged with an Implementing Agency of the GEF in the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the International Control of the
Please indicate which agency:
If the NBSAP has been adopted by the Government.
By which authority?
On what date?
